

3 Very Important Points Not To Be Missed Before Making University Applications

1. Make a list of dream + universities, dream universities and target universities. Target universities are the ones that are as per your academic marks and profile and you are quite sure to get into.
2. Select a country that offers good career prospects, even if not many people are going there. Don't follow the herd.
3. Apply early so that once you have an offer letter, you can apply for scholarships.
